MODEL ANSWERS: Mathematics Paper 1: Arithmetic

A: 814

Method: Line up the digits in columns. 124 + 690 = 814.

A: 1283

Method: Line up the digits in columns. 248 + 1035 = 1283.

A: 1752

Method: Line up the digits in columns. 372 + 1380 = 1752.

A: 2221

Method: Line up the digits in columns. 496 + 1725 = 2221.

A: 965

Method: Line up the digits in columns. 620 + 345 = 965.

A: 1434

Method: Line up the digits in columns. 744 + 690 = 1434.

A: 1903

Method: Line up the digits in columns. 868 + 1035 = 1903.

A: 2372

Method: Line up the digits in columns. 992 + 1380 = 2372.

A: 2841

Method: Line up the digits in columns. 1116 + 1725 = 2841.

A: 1585

Method: Line up the digits in columns. 1240 + 345 = 1585.

A: 2054

Method: Line up the digits in columns. 1364 + 690 = 2054.

A: 2523

Method: Line up the digits in columns. 1488 + 1035 = 2523.

A: 2992

Method: Line up the digits in columns. 1612 + 1380 = 2992.

A: 3461

Method: Line up the digits in columns. 1736 + 1725 = 3461.

A: 2205

Method: Line up the digits in columns. 1860 + 345 = 2205.

A: 2674

Method: Line up the digits in columns. 1984 + 690 = 2674.

A: 3143

Method: Line up the digits in columns. 2108 + 1035 = 3143.

A: 3612

Method: Line up the digits in columns. 2232 + 1380 = 3612.

A: 4081

Method: Line up the digits in columns. 2356 + 1725 = 4081.

A: 2825

Method: Line up the digits in columns. 2480 + 345 = 2825.

A: 11/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (1). (2 * 5) + 1 = 11.*

A: 12/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (2). (2 * 5) + 2 = 12.*

A: 13/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (3). (2 * 5) + 3 = 13.*

A: 14/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (4). (2 * 5) + 4 = 14.*

A: 15/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (5). (2 * 5) + 5 = 15.*

A: 16/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (6). (2 * 5) + 6 = 16.*

A: 17/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (7). (2 * 5) + 7 = 17.*

A: 18/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (8). (2 * 5) + 8 = 18.*

A: 19/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (9). (2 * 5) + 9 = 19.*

A: 20/5

*Method: Multiply the whole number (2) by the denominator (5), then add the numerator (10). (2 * 5) + 10 = 20.*

A: 59.5

*Method: Find 1/4 of 100 (100/4 = 25.0), multiply by 3 (25.0 * 3 = 75.0), then subtract 15.5.*

A: 134.5

*Method: Find 1/4 of 200 (200/4 = 50.0), multiply by 3 (50.0 * 3 = 150.0), then subtract 15.5.*

A: 209.5

*Method: Find 1/4 of 300 (300/4 = 75.0), multiply by 3 (75.0 * 3 = 225.0), then subtract 15.5.*

A: 284.5

*Method: Find 1/4 of 400 (400/4 = 100.0), multiply by 3 (100.0 * 3 = 300.0), then subtract 15.5.*

A: 359.5

*Method: Find 1/4 of 500 (500/4 = 125.0), multiply by 3 (125.0 * 3 = 375.0), then subtract 15.5.*

A: 434.5

*Method: Find 1/4 of 600 (600/4 = 150.0), multiply by 3 (150.0 * 3 = 450.0), then subtract 15.5.*

A: 509.5

*Method: Find 1/4 of 700 (700/4 = 175.0), multiply by 3 (175.0 * 3 = 525.0), then subtract 15.5.*

A: 584.5

*Method: Find 1/4 of 800 (800/4 = 200.0), multiply by 3 (200.0 * 3 = 600.0), then subtract 15.5.*

A: 659.5

*Method: Find 1/4 of 900 (900/4 = 225.0), multiply by 3 (225.0 * 3 = 675.0), then subtract 15.5.*

A: 734.5

*Method: Find 1/4 of 1000 (1000/4 = 250.0), multiply by 3 (250.0 * 3 = 750.0), then subtract 15.5.*
