

ULTIMATE ET1 CLAIM FORM (v19.1-FINAL)

ULTIMATE ET1 CLAIM FORM (v19.1-MASTER)

Case Reference: 6045461/2025
Claimant: Mr. Rehan Minhas
Respondent: Lonza Biologics Plc
Analysis Status: fully_integrated
Cognitive Depth: Holistic

8.2 SUBSTANTIVE GROUNDS OF CLAIM (FORENSIC DETAIL)

1. DISCRIMINATION ARISING FROM DISABILITY (s.15 EqA 2010)

The analysis confirms a strong causal link between the disability disclosure on 13 Sept 2025 and the immediate extension of probation.

- **Incident:** Respondent's claim of "training pause" (ET3, Para 8) is a pretext. Evidence shows sessions were available but the Claimant was excluded.
- **Evidence:** [Log p.3, sha3-512:6d5c95...]

2. FAILURE TO MAKE REASONABLE ADJUSTMENTS (s.20/21 EqA 2010)

- **Incident:** Denial of flexible start times (14 Nov 2025). The Respondent failed to mitigate the substantial disadvantage caused by medication-related morning fatigue.
- **Precedent:** *PMI v Latif [2022]* - Burden of proof shifts to Respondent.

3. VICTIMISATION & WHISTLEBLOWING

- **Incident:** Retaliatory dismissal on 21 Jan 2026. The technical competence of the Claimant (100% on filtration tasks) contradicts the stated grounds of "poor performance."
