

Health Impact Timeline Annex

HEALTH IMPACT TIMELINE ANNEX - v19.0

****Claimant:**** Mr. Rehan Minhas
****Period:**** September 2025 – January 2026

1. POST-DISCLOSURE HEALTH DETERIORATION

Following the disclosure of his disability on 13 September 2025, the Claimant experienced a documented decline in health, directly correlating with discriminatory acts and adjustment failures.

Date	Incident/Trigger	Health Impact Reported	Source Reference
13 Sep 2025	Probation extension post-disclosure	Acute vulnerability, increased humiliation, sleep disruption.	Log p.3
26 Sep 2025	Public admonishment by SD	Spike in anxiety and panic symptoms; insomnia worsened.	Log p.4
27 Sep 2025	Intensified monitoring ("16 queries")	Severe humiliation, emotional distress, appetite loss.	Log p.5
03 Oct 2025	**Cumulative Stress / Shaming**	**Psychiatric Crisis; NHS Crisis Team involvement.**	**Log p.6**
16 Oct 2025	Referral to OH (delayed)	Continued work-related stress reported.	Outcome Letter p.1
13 Nov 2025	OH recommends WAP/SRA	Claimant documented as requiring adjustments to mitigate stress.	Outcome Letter p.1

2. CLINICAL CORRELATION ANALYSIS

The Respondent was aware of the Claimant's disability and medication side-effects. By applying aggressive monitoring and public shaming during a period of known vulnerability, the Respondent exacerbated the Claimant's condition. The timeline demonstrates that discrimination was not static; it became more aggressive as the Claimant's clinical stability was undermined by the Respondent's failure to make reasonable adjustments.
