- **DSP:** Downstream Processing (referenced in prior log)

Summary of Core Allegations (short)T

his updated log documents three separate incidents post-grievance submission (6 October 2025), including public shaming by SLS, dismissive questioning of suitability by RJ, and persistent name misuse by MOC in front of RJ. These events, linked to the absence of interim measures (e.g., RJ/SD reassignment), have worsened my mental health condition (anxiety, insomnia, panic and restlessness episodes), directly tied to the NHS crisis intervention on 3 October 2025, reinforcing the need for safeguards

.

Detailed, Chronological Incident Entries (ACAS standard)

Note: each entry follows the structure: **Date / Time / Location → Factual description → Actions taken at the time → Immediate impact observed → Policy / legal issues (brief) → Evidence & Witnesses.**

Incident 1: 11 October 2025 — Throughout Shift (c.06:00–18:00) Location: Building 228 (Suite 1, stockroom, autoclave room, buffer prep area, other suites)

Factual description: Worked in Suite 1 with MIB (supervisor for pH adjustment process, assisted by me and KDY) and SLS (supervisor for ratio dilution process, assisted by SHC and SAV). Teams were decided in the morning with discussion between MIB and SLS. During the shift, As always I consistently followed supervisors' requests, actively engaged in routine signed-off tasks (pH/conductivity meter calibration and testing, balance calibration, preparing filtered WiFi, pushing through terminals required buffers, draining discard buffers, waste and biological hazardous waste discards, suite end-of-day cleaning, contributing to handover documents), regularly asked supervisors for work when unable to find tasks, and observed/helped others being trained. On one occasion, SLS handed me a handwritten list to collect stock items from buffer prep and autoclave rooms; I asked what a "reducer" looked like as I could not recall. SLS asked how long I had worked here; I replied about two months. SLS responded in a rude, public shaming outburst, saying I should know what it looks like after working here so long. Later, SLS requested I carry out viable/non-viable environmental monitoring; I explained I was signed off but uncomfortable doing it independently as I had not used the procedures since training. SLS became visibly angry, saying in a loud, intimidating voice that I should not sign for training I was not comfortable doing, then mockingly said she had been off suites for 2 months and still remembered all procedures, in front of the whole team, creating a tense environment.

Actions taken at the time: Complied with all requests, sought clarification on tasks, corrected SLS on training comfort level, continued other duties, and made contemporaneous notes after the shift. Followed up with RJ the next day (12 Oct) about lateness due to insomnia from this incident.

Immediate impact: Profound humiliation and distress from public shaming; intensified anxiety, panic and restlessness episodes, and insomnia (<4 hours sleep); felt targeted, leading to social withdrawal, feeling aggrieved and reduced concentration.

Policy / legal issues: Harassment (EqA s.26) and victimisation (EqA s.27) related to disability; breach of Conduct Policy 1.5.1 (bullying/public humiliation); failure to uphold dignity at work (Sickness Absence Policy 2.9); HSWA s.2 (welfare duty).

Evidence: Contemporaneous notes (11 Oct 2025); shift schedule/handover documents showing tasks completed; handwritten list from SLS (if retained); request IT preserve any Teams/emails related to shift; GP letter referencing ongoing distress.

Witnesses: MIB (supervisor), SLS (supervisor), SHC, SAV, KDY.

Incident 2: 12 October 2025 — c.08:30 (Morning) Location: Building 640 (hot desk area / meeting room, 1st floor)

Factual description: Arrived ~1.5 hours late; messaged RJ in advance. Upon arrival, I asked RJ for a private discussion in the meeting room. I explained the lateness was due

to insomnia caused by SLS's angry, confrontational, and public shaming behaviours the previous day (11 Oct 2025), which made me feel my right to dignity was disrespected, leaving me aggrieved and unable to sleep, impacting my personal life and work. RJ said he had spoken with SLS and other witnesses about my performance, noting concerns that I spent a lot of time sitting around and not actively participating. RJ mentioned other prior concerns raised by colleagues (e.g., I look nervous, toilet use, unlocatability reframed as late from lunch). RJ then proceeded to discussing with me his concern of regular lateness incidents referring to my reported incidents of lateness which I had reported as per procedure, also said that he felt it was disrespectful if I did not report incidents of lateness. RJ then questioned my suitability for the role and probation passage in a dismissive way. I reiterated distress from SLS's unprofessional tone and requested follow-up/investigation. RJ followed up via email (12:54 PM) referencing the incidents requesting further detail on all concerns raised.

Actions taken at the time: Explained lateness and distress to RJ; requested investigation of SLS's behavior; continued shift duties; sent email to RJ (12:27 PM) requesting full feedback details/template; RJ replied at 12:54 PM : to which I replied at 8:14 today reclarifying request for details on feedback and concerns. Made contemporaneous notes.

Immediate impact: Heightened distress and anxiety from RJ's dismissive questioning of suitability; exacerbated insomnia, restlessness and panic episodes; felt targeted and humiliated, leading to further social withdrawal and professional disengagement.

Policy / legal issues: Victimisation (EqA s.27) for raising concerns; breach of Conduct Policy 1.5.1 (dismissive treatment); HSWA s.2 (failure to address welfare impact).

Evidence: Contemporaneous notes (12 Oct 2025); email to RJ (12:27 PM) and RJ's reply (12:54 PM); shift message about lateness; request IT preserve emails/Teams related to feedback.

Witnesses: RJ (Razwan Jamil, line manager).

Incident 3: 12 October 2025 — c.12:00 (Midday) Location: Building 228 (Suite 3)

Factual description: Worked in Suite 3 with SAV, KDY, MOC, and DAR (scheduled for P&S AKTA training). MOC mispronounced my name as "Ragu"; I corrected her with the proper pronunciation. MOC said I had previously said I was happy being called Ragu; I corrected that I did not recall this, though I had said "Ray" if she found hard to remember my actual name, but preferred my actual name. MOC continued calling me Ragu or Ray, turning it into a team spectacle in front of SAV, KDY, DAR, and RJ, who commented casually "it's fine as long as no one's feelings are hurt," dismissing my concern. This surprised me, as my name's pronunciation is not difficult, yet MOC persisted with Ray.

Actions taken at the time: Corrected MOC on name and reiterated preference; continued shift duties; made contemporaneous notes.

Immediate impact: Distress and anxiety from persistent misuse and team spectacle; felt humiliated, exacerbating insomnia and social withdrawal.

Policy / legal issues: Harassment (EqA s.26) related to disability and dignity; breach of Conduct Policy 1.5.1 (public mockery); HSWA s.2 (welfare duty).

Evidence: Contemporaneous notes (12 Oct 2025); shift schedule showing team/discussion; request IT preserve any Teams/emails related to training.

Witnesses: MOC (supervisor), SAV, KDY, DAR, RJ (Razwan Jamil, line manager).

Ongoing / Additional Notes (Post-Grievance Submission Update)

- **Procedural Concerns:** The lack of interim measures and internal investigator (Vicky Jessop) increases victimisation risk, as evidenced by these incidents.
- **Pattern:** These events show continued shaming and suitability questioning, directly linked to unchanged management, exacerbating my condition and supporting grievance claims.

Witness Summary (for investigator)

Primary witnesses who were present during or who have direct knowledge of the incidents above (full names and contact details to be provided to investigator on request):

MIB (supervisor), SLS (supervisor), SHC, SAV, KDY, MOC (supervisor), DAR, RJ (line manager).

Evidence Summary (for preservation)

Please preserve the following (in addition to prior legal hold):

Digital evidence

- Email exchange with RJ (12:27–12:54 BST, 12 Oct 2025).
- Shift schedules/handover documents (11–12 Oct 2025).

Physical evidence

- Suite and Equipment Logbooks, batch and production records (11 Oct 2025).

Medical & third-party evidence

- GP letter (Dr Tamkin Abas – 30 Sep 2025).
- NHS crisis notes (3 Oct 2025).

Communications

- All post-submission emails (preserved copies).

Causation & Impact — summary statement

Each incident recorded above contributed directly to a progressive deterioration in my mental health: heightened anxiety, insomnia, restlessness and panic episodes, appetite loss and social withdrawal. The public shaming, suitability questioning, and lack of interim measures intensified the harm, directly linked to the NHS crisis care on **3 October 2025**. The pattern of conduct is therefore causally linked to the psychiatric injury I experienced.

Declaration & authenticity

I confirm that these notes were prepared contemporaneously (dates/times recorded at or shortly after the events) and are a true and accurate record to the best of my knowledge and belief. Originals of electronic notes, emails, and further documentary evidence are retained and will be made available to the investigator or tribunal.
