

MODEL ANSWERS: Mathematics Paper 1:

Arithmetic

A: 713

Method: Line up the digits in columns. Start from the right (ones). $467 + 246 = 713$.

A: 847

Method: Line up the digits in columns. Start from the right (ones). $478 + 369 = 847$.

A: 612

Method: Line up the digits in columns. Start from the right (ones). $489 + 123 = 612$.

A: 746

Method: Line up the digits in columns. Start from the right (ones). $500 + 246 = 746$.

A: 880

Method: Line up the digits in columns. Start from the right (ones). $511 + 369 = 880$.

A: 645

Method: Line up the digits in columns. Start from the right (ones). $522 + 123 = 645$.

A: 779

Method: Line up the digits in columns. Start from the right (ones). $533 + 246 = 779$.

A: 913

Method: Line up the digits in columns. Start from the right (ones). $544 + 369 = 913$.

A: 678

Method: Line up the digits in columns. Start from the right (ones). $555 + 123 = 678$.

A: 812

Method: Line up the digits in columns. Start from the right (ones). $566 + 246 = 812$.

A: 946

Method: Line up the digits in columns. Start from the right (ones). $577 + 369 = 946$.

A: 711

Method: Line up the digits in columns. Start from the right (ones). $588 + 123 = 711$.

A: 845

Method: Line up the digits in columns. Start from the right (ones). $599 + 246 = 845$.

A: 979

Method: Line up the digits in columns. Start from the right (ones). $610 + 369 = 979$.

A: 744

Method: Line up the digits in columns. Start from the right (ones). $621 + 123 = 744$.

A: 878

Method: Line up the digits in columns. Start from the right (ones). $632 + 246 = 878$.

A: 1012

Method: Line up the digits in columns. Start from the right (ones). $643 + 369 = 1012$.

A: 777

Method: Line up the digits in columns. Start from the right (ones). $654 + 123 = 777$.

A: 911

Method: Line up the digits in columns. Start from the right (ones). $665 + 246 = 911$.

A: 1045

Method: Line up the digits in columns. Start from the right (ones). $676 + 369 = 1045$.

A: 25/8

Method: Multiply whole number (3) by denominator (8) and add numerator (1). $(3 * 8) + 1 = 25$.

A: 26/8

Method: Multiply whole number (3) by denominator (8) and add numerator (2). $(3 * 8) + 2 = 26$.

A: 27/8

Method: Multiply whole number (3) by denominator (8) and add numerator (3). $(3 * 8) + 3 = 27$.

A: 28/8

Method: Multiply whole number (3) by denominator (8) and add numerator (4). $(3 * 8) + 4 = 28$.

A: 29/8

Method: Multiply whole number (3) by denominator (8) and add numerator (5). $(3 * 8) + 5 = 29$.

A: 30/8

Method: Multiply whole number (3) by denominator (8) and add numerator (6). $(3 * 8) + 6 = 30$.

A: 31/8

Method: Multiply whole number (3) by denominator (8) and add numerator (7). $(3 * 8) + 7 = 31$.

A: 32/8

Method: Multiply whole number (3) by denominator (8) and add numerator (8). $(3 * 8) + 8 = 32$.

A: 33/8

Method: Multiply whole number (3) by denominator (8) and add numerator (9). $(3 * 8) + 9 = 33$.

A: 34/8

Method: Multiply whole number (3) by denominator (8) and add numerator (10). $(3 * 8) + 10 = 34$.

A: 410.7

Method: Align the decimal points. Add a placeholder zero to 480.5 if needed. $480.5 - 69.8 = 410.7$.

A: 424.0

Method: Align the decimal points. Add a placeholder zero to 496.0 if needed. $496.0 - 72.0 = 424.0$.

A: 437.3

Method: Align the decimal points. Add a placeholder zero to 511.5 if needed. $511.5 - 74.2 = 437.3$.

A: 450.5

Method: Align the decimal points. Add a placeholder zero to 527.0 if needed. $527.0 - 76.5 = 450.5$.

A: 463.7

Method: Align the decimal points. Add a placeholder zero to 542.5 if needed. $542.5 - 78.8 = 463.7$.

A: 477.0

Method: Align the decimal points. Add a placeholder zero to 558.0 if needed. $558.0 - 81.0 = 477.0$.

A: 490.3

Method: Align the decimal points. Add a placeholder zero to 573.5 if needed. $573.5 - 83.2 = 490.3$.

A: 503.5

Method: Align the decimal points. Add a placeholder zero to 589.0 if needed. $589.0 - 85.5 = 503.5$.

A: 516.7

Method: Align the decimal points. Add a placeholder zero to 604.5 if needed. $604.5 - 87.8 = 516.7$.

A: 530.0

Method: Align the decimal points. Add a placeholder zero to 620.0 if needed. $620.0 - 90.0 = 530.0$.
