

# Response to ET3 Grounds of Resistance

## RESPONSE TO ET3 GROUNDS OF RESISTANCE

**\*\*Case:\*\*** Minhas v Lonza Biologics Plc

**\*\*Reference:\*\*** 6045461/2025

### 1. PRELIMINARY REBUTTAL

The Respondent's Grounds of Resistance (18.02.2026) attempt to reframe discriminatory acts as "reasonable performance monitoring." The Claimant maintains that these actions were triggered solely by his disability disclosure.

### 2. REBUTTAL OF "TRAINING PAUSE" (Para 8)

- **\*\*Respondent Claims:\*\*** Claimant's Biotech 1 training was "paused" due to resource issues.
- **\*\*Claimant Rebuttal:\*\*** Training sessions were available but the Claimant was systematically excluded from them following his disclosure on 13 Sept 2025. This was not a resource issue but a targeted sidelining of a disabled employee.

### 3. REBUTTAL OF "LACK OF PARTICULARISATION" (Para 4)

- **\*\*Respondent Claims:\*\*** Unable to respond due to lack of detail.
- **\*\*Claimant Rebuttal:\*\*** The accompanying v19 Clarification Package provides exhaustive, incident-level detail for every claim, including dates, times, and witnesses. The Respondent's claim is no longer tenable.

### 4. REBUTTAL OF DISABILITY DENIAL (Para 5)

- **\*\*Respondent Claims:\*\*** Put to proof regarding disability status.
- **\*\*Claimant Rebuttal:\*\*** The Claimant has provided clinical evidence of a psychiatric crisis on 03 Oct 2025 and NHS crisis team involvement. The Respondent was aware of these impairments and failed to adjust.

### 5. REBUTTAL OF "REASONABLE EXPECTATIONS" (Para 2)

- **\*\*Respondent Claims:\*\*** Termination was due to failure to meet expectations.
- **\*\*Claimant Rebuttal:\*\*** The "expectations" were 95% completion targets imposed only on the Claimant post-disclosure. This constitutes unfavourable treatment under s.15 EqA 2010.
