

Regulatory Strategy Memo: LTSA Suite

PROACTIVE ALIGNMENT: FDA INTERACT & EMA PRAC

Date: 2026-03-28
To: Chief Governance Officer (CGO), Workstation AI CEO

1. Purpose

This memo outlines the proactive regulatory strategy for the Long-Term Safety Assurance (LTSA) Suite, ensuring full alignment with Article 1107 and Article 1127 (Autonomous Evolution) of the Supreme Constitution.

2. FDA INTERACT Engagement (Q2 2026)

We will initiate an INitial Targeted Engagement for Regulatory Advice on CBER products (INTERACT) meeting to discuss our novel real-time cytokine monitoring (RCM) sensor integration and its role in dose escalation safety.

3. EMA PRAC & EU Legislation Overhaul

The Pharmacovigilance Risk Assessment Committee (PRAC) is expected to overhaul long-term follow-up (LTFU) requirements by Q3 2026. The LTSA Suite's 15-year digital health vault (SLF) will be proposed as the reference architecture.

4. Regulatory Timeline

Phase	Milestone	Target Date
Initial Filing	INTERACT Meeting Submission	April 15, 2026
Tech Review	EMA PRAC Methodology Briefing	June 10, 2026
Validation	FDA Type C Meeting	August 5, 2026
Approval	Sovereign Framework Certification	September 30, 2026

5. Risk-Based Classification

The LTSA suite is classified as a 'Sovereign Safety Overlay' (SSO). It operates independently of existing electronic data capture (EDC) systems to ensure unbiased monitoring and constitutional veto capability (EAIDE).
