

KS2 SATs 2026 COMPLETE PREPARATION PACK

Prepared for: Ayaan

Norbury School, Harrow

You've got this, Ayaan! Let's work together, step by step.

Constitutional Guard & UEG Logged

■ 14-Day Revision Schedule

Personalized for Ayaan (Norbury School, Harrow)

Day 1 - 2026-05-01 (Intensive Revision)

Keep going, Ayaan – you've got this!

- **09:00 - 09:30:** Topic Focus: Maths: Algebra & Equations (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 2 - 2026-05-02 (Intensive Revision)

Well done, Ayaan! You're making great progress.

- **09:00 - 09:30:** Topic Focus: Reading: 3-mark LINK structure (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 3 - 2026-05-03 (Intensive Revision)

Great work! Arsenal would be proud of this effort.

- **09:00 - 09:30:** Topic Focus: Maths: Fractions (Mixed/Improper) (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 4 - 2026-05-04 (Intensive Revision)

You're building your knowledge like a Minecraft pro!

- **09:00 - 09:30:** Topic Focus: English: Possessive Apostrophes (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 5 - 2026-05-05 (Intensive Revision)

Every session brings you closer to your goal, Ayaan.

- **09:00 - 09:30:** Topic Focus: Maths: Algebra & Equations (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 6 - 2026-05-06 (Intensive Revision)

Stay focused – you're doing amazing!

- **09:00 - 09:30:** Topic Focus: Reading: 3-mark LINK structure (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 7 - 2026-05-07 (Intensive Revision)

Nearly there! One final push.

- **09:00 - 09:30:** Topic Focus: Maths: Fractions (Mixed/Improper) (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)

- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 8 - 2026-05-08 (Intensive Revision)

Keep going, Ayaan – you've got this!

- **09:00 - 09:30:** Topic Focus: English: Possessive Apostrophes (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 9 - 2026-05-09 (Intensive Revision)

Well done, Ayaan! You're making great progress.

- **09:00 - 09:30:** Topic Focus: Maths: Algebra & Equations (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 10 - 2026-05-10 (Intensive Revision)

Great work! Arsenal would be proud of this effort.

- **09:00 - 09:30:** Topic Focus: Reading: 3-mark LINK structure (Goal: Bridge gaps)
- **11:00 - 11:30:** Sensory Break / Physical Activity (Goal: Prevent fatigue)
- **16:00 - 16:30:** Practice Paper Set & Model Answer Review (Goal: Consistency)

Day 11 - 2026-05-11 (SATs EXAM WEEK)

You're building your knowledge like a Minecraft pro!

- **09:00 - 11:00:** SATs EXAM: English GPS (Goal: Perform best)
- **13:00 - 14:00:** Rest & Recover: Arsenal/Minecraft time (Goal: Recharge)
- **16:00 - 16:30:** Light Review for tomorrow's paper (Goal: Confidence)

Day 12 - 2026-05-12 (SATs EXAM WEEK)

Every session brings you closer to your goal, Ayaan.

- **09:00 - 11:00:** SATs EXAM: English Reading (Goal: Perform best)
- **13:00 - 14:00:** Rest & Recover: Arsenal/Minecraft time (Goal: Recharge)
- **16:00 - 16:30:** Light Review for tomorrow's paper (Goal: Confidence)

Day 13 - 2026-05-13 (SATs EXAM WEEK)

Stay focused – you're doing amazing!

- **09:00 - 11:00:** SATs EXAM: Maths Arithmetic & Reasoning 1 (Goal: Perform best)
- **13:00 - 14:00:** Rest & Recover: Arsenal/Minecraft time (Goal: Recharge)
- **16:00 - 16:30:** Light Review for tomorrow's paper (Goal: Confidence)

Day 14 - 2026-05-14 (SATs EXAM WEEK)

Nearly there! One final push.

- **09:00 - 11:00:** SATs EXAM: Maths Reasoning 2 (Goal: Perform best)
- **13:00 - 14:00:** Rest & Recover: Arsenal/Minecraft time (Goal: Recharge)
- **16:00 - 16:30:** Light Review for tomorrow's paper (Goal: Confidence)

■ PREDICTED QUESTIONS: English Grammar, Punctuation & Spelling

Ayaan - Norbury School

GPS_1: Circle the possessive apostrophe: The Arsenal players' dressing room was ready for the big match.

GPS_2: Underline the subordinate clause: While Ayaan was building his Minecraft base, a creeper appeared behind him.

GPS_3: Which sentence uses the possessive apostrophe correctly? (Ayaan's rocket took off / Ayaans' rocket took off)

GPS_4: The pupils of Norbury School ____ (celebrate/celebrates) their SATs achievements. Circle the correct verb.

GPS_5: Spell: profession

GPS_6: Spell: exaggeration

GPS_7: Spell: conscience

GPS_8: Spell: queue

GPS_9: Spell: immediately

■ MODEL ANSWERS: English Grammar, Punctuation & Spelling

Step-by-Step Solutions for Ayaan

A: players'

Method: The players (plural) own the room. Since it ends in 's', add the apostrophe after the 's'.

A: While Ayaan was building his Minecraft base

Method: This is a subordinate clause because it starts with the conjunction 'While' and doesn't make sense on its own.

A: Ayaan's rocket took off

Method: Ayaan is singular. Add 's to show possession.

A: celebrate

Method: The subject 'pupils' is plural, so we use the plural verb 'celebrate'.

A: profession

Method: Spelling rule or pattern reinforcement.

A: exaggeration

Method: Spelling rule or pattern reinforcement.

A: conscience

Method: Spelling rule or pattern reinforcement.

A: queue

Method: Spelling rule or pattern reinforcement.

A: immediately

Method: Spelling rule or pattern reinforcement.

■ PREDICTED QUESTIONS: English Reading

Ayaan - Norbury School

RD_1: Give two pieces of evidence from the text that show Ayaan was excited about visiting Headstone Manor Park.

RD_2: Compare the description of the Emirates Stadium at the beginning of the match to the description at the end. Use the LINK structure.

RD_3: How does the author show that the Minecraft world felt real to the players? Use quotes to support your answer.

RD_4: What does the word 'immense' mean in the context of the rocket's launch?

■ MODEL ANSWERS: English Reading

Step-by-Step Solutions for Ayaan

A: Evidence 1: He arrived 20 minutes before the gates opened. Evidence 2: He was wearing his favorite Arsenal kit for the trip.

Method: Inference (Domain 2d): Use direct evidence from the text to support your points.

A:

Link: The stadium is described as energetic at the start but tense at the end.

Evidence 1: At the start, the crowd was a 'roaring ocean of red'.

Evidence 2: At the end, there was a 'hushed, heavy silence'.

Explain: The contrast between 'roaring' and 'silence' shows how the atmosphere shifted as the game became closer.

Method: Comparison (LINK): Use the LINK structure (Link, Evidence 1, Evidence 2, Explain) to earn all 3 marks.

A: The author says the wind felt 'cold on their faces' and they could 'smell the woodsmoke' from the virtual fires.

Method: Inference (Domain 2d): Using sensory details as quotes provides strong evidence.

A: Immense means extremely large or huge.

Method: Vocabulary: Look at the surrounding sentences to find clues about the word's meaning.

■ PREDICTED QUESTIONS: Mathematics Paper 1: Arithmetic

Ayaan - Norbury School

MA_1: $1025 + 1000$

MA_2: $1050 + 1500$

MA_3: $1075 + 2000$

MA_4: $1100 + 500$

MA_5: $1125 + 1000$

MA_6: $1150 + 1500$

MA_7: $1175 + 2000$

MA_8: $1200 + 500$

MA_9: $1225 + 1000$

MA_10: $1250 + 1500$

MA_11: $1275 + 2000$

MA_12: $1300 + 500$

MA_13: $1325 + 1000$

MA_14: $1350 + 1500$

MA_15: $1375 + 2000$

MA_16: $1400 + 500$

MA_17: $1425 + 1000$

MA_18: $1450 + 1500$

MA_19: $1475 + 2000$

MA_20: $1500 + 500$

MA_21: Convert 5 and $\frac{1}{9}$ to an improper fraction.

MA_22: Convert 5 and $\frac{2}{9}$ to an improper fraction.

MA_23: Convert 5 and $\frac{3}{9}$ to an improper fraction.

MA_24: Convert 5 and $\frac{4}{9}$ to an improper fraction.

MA_25: Convert 5 and $\frac{5}{9}$ to an improper fraction.

MA_26: Convert 5 and $\frac{6}{9}$ to an improper fraction.

MA_27: Convert 5 and $\frac{7}{9}$ to an improper fraction.

MA_28: Convert 5 and $\frac{8}{9}$ to an improper fraction.

MA_29: Convert 5 and $\frac{9}{9}$ to an improper fraction.

MA_30: Convert 5 and $\frac{10}{9}$ to an improper fraction.

MA_31: Convert 5 and $\frac{11}{9}$ to an improper fraction.

MA_32: Convert 5 and $\frac{12}{9}$ to an improper fraction.

MA_33: Convert 5 and $\frac{13}{9}$ to an improper fraction.

MA_34: Convert 5 and $\frac{14}{9}$ to an improper fraction.

MA_35: Convert 5 and $\frac{15}{9}$ to an improper fraction.

MA_36: 738.0 - 63.0

MA_37: 758.5 - 64.8

MA_38: 779.0 - 66.5

MA_39: 799.5 - 68.2

MA_40: 820.0 - 70.0

■ MODEL ANSWERS: Mathematics Paper 1:

Arithmetic

Step-by-Step Solutions for Ayaan

A: 2025

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2025.

A: 2550

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2550.

A: 3075

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 3075.

A: 1600

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 1600.

A: 2125

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2125.

A: 2650

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2650.

A: 3175

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 3175.

A: 1700

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 1700.

A: 2225

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2225.

A: 2750

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2750.

A: 3275

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 3275.

A: 1800

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 1800.

A: 2325

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2325.

A: 2850

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2850.

A: 3375

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 3375.

A: 1900

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 1900.

A: 2425

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2425.

A: 2950

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2950.

A: 3475

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 3475.

A: 2000

Method: Step 1: Write the numbers in columns, aligning place values. Step 2: Add ones (0+0), tens (0+0), hundreds (0+5). Step 3: Add thousands (1+0). Total: 2000.

A: 46/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (1): $45 + 1 = 46$. Step 3: Put this over the original denominator: 46/9.

A: 47/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (2): $45 + 2 = 47$. Step 3: Put this over the original denominator: 47/9.

A: 48/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (3): $45 + 3 = 48$. Step 3: Put this over the original denominator: 48/9.

A: 49/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (4): $45 + 4 = 49$. Step 3: Put this over the original denominator: 49/9.

A: 50/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (5): $45 + 5 = 50$. Step 3: Put this over the original denominator: 50/9.

A: 51/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (6): $45 + 6 = 51$. Step 3: Put this over the original denominator: 51/9.

A: 52/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (7): $45 + 7 = 52$. Step 3: Put this over the original denominator: 52/9.

A: 53/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (8): $45 + 8 = 53$. Step 3: Put this over the original denominator: 53/9.

A: 54/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (9): $45 + 9 = 54$. Step 3: Put this over the original denominator: 54/9.

A: 55/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (10): $45 + 10 = 55$. Step 3: Put this over the original denominator: 55/9.

A: 56/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (11): $45 + 11 = 56$. Step 3: Put this over the original denominator: 56/9.

A: 57/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (12): $45 + 12 = 57$. Step 3: Put this over the original denominator: 57/9.

A: 58/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (13): $45 + 13 = 58$. Step 3: Put this over the original denominator: 58/9.

A: 59/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (14): $45 + 14 = 59$. Step 3: Put this over the original denominator: 59/9.

A: 60/9

Method: Step 1: Multiply the whole number (5) by the denominator (9): $5 * 9 = 45$. Step 2: Add the numerator (15): $45 + 15 = 60$. Step 3: Put this over the original denominator: 60/9.

A: 675.0

Method: Step 1: Align decimal points. Add a placeholder 0 to 63.0 if needed to match decimal places. Step 2: Subtract normally, keeping decimal in line. $738.0 - 63.0 = 675.0$.

A: 693.7

Method: Step 1: Align decimal points. Add a placeholder 0 to 64.8 if needed to match decimal places. Step 2: Subtract normally, keeping decimal in line. $758.5 - 64.8 = 693.7$.

A: 712.5

Method: Step 1: Align decimal points. Add a placeholder 0 to 66.5 if needed to match decimal places. Step 2: Subtract normally, keeping decimal in line. $779.0 - 66.5 = 712.5$.

A: 731.3

Method: Step 1: Align decimal points. Add a placeholder 0 to 68.2 if needed to match decimal places. Step 2: Subtract normally, keeping decimal in line. $799.5 - 68.2 = 731.3$.

A: 750.0

Method: Step 1: Align decimal points. Add a placeholder 0 to 70.0 if needed to match decimal places. Step 2: Subtract normally, keeping decimal in line. $820.0 - 70.0 = 750.0$.

■ PREDICTED QUESTIONS: Mathematics Paper 2: Reasoning

Ayaan - Norbury School

MR2_1: Ayaan's favorite team Arsenal played 38 matches. If they win 'w' matches and lose 5, write an algebraic expression for the matches they drew.

MR2_2: In a Minecraft world, the ratio of diamonds to emeralds in a chest is 3:5. If Ayaan finds 15 diamonds, how many emeralds are there?

MR2_3: A bus from Harrow town centre to Norbury School travels 2.4 miles. How many metres is that?

MR2_4: If $x + 15 = 40$, what is the value of x in Ayaan's Minecraft score calculation?

■ MODEL ANSWERS: Mathematics Paper 2: Reasoning

Step-by-Step Solutions for Ayaan

A: $38 - w - 5$

Method: Step 1: Start with total matches (38). Step 2: Subtract wins (w) and losses (5). The remaining matches are draws. Expression: $38 - w - 5$ (or $33 - w$).

A: 25 emeralds

*Method: Step 1: Ratio is 3:5. Step 2: Ayaan found 15 diamonds. 15 is $3 * 5$. Step 3: Multiply the emerald part by the same number (5): $5 * 5 = 25$.*

A: 3,862.4m (approx) or 3,840m if using 1.6km conversion

*Method: Step 1: 1 mile is approx 1.6km. $2.4 \text{ miles} * 1.6 = 3.84\text{km}$. Step 2: Convert km to m by multiplying by 1000. $3.84 * 1000 = 3,840\text{m}$.*

A: 25

Method: Step 1: To find x, subtract 15 from both sides of the equation. Step 2: $40 - 15 = 25$. So, $x = 25$.

■ PREDICTED QUESTIONS: Mathematics Paper 3: Reasoning

Ayaan - Norbury School

MR3_1: The temperature on Mars is -63°C . It rises by 15°C . What is the new temperature for Ayaan's rover?

MR3_2: Calculate the area of a rectangular farm in Minecraft that is 12 blocks long and 9 blocks wide.

MR3_3: Bukayo Saka ran 10.5km in a match. Write this distance in meters.

MR3_4: Ayaan walks from Norbury School to Headstone Manor Park. It takes 18 minutes. If he arrives at 16:05, what time did he leave school?

■ MODEL ANSWERS: Mathematics Paper 3: Reasoning

Step-by-Step Solutions for Ayaan

A: -48C

Method: Step 1: Start at -63. Step 2: 'Rises' means add. $-63 + 15$. Step 3: Moving 15 steps towards zero from -63 gives -48.

A: 108 blocks squared

*Method: Step 1: Area = length * width. Step 2: $12 * 9 = 108$. Don't forget the 'squared' unit!*

A: 10,500m

*Method: Step 1: Multiply km by 1,000 to get meters. Step 2: $10.5 * 1,000 = 10,500$.*

A: 15:47

Method: Step 1: Start at 16:05 and count back 18 minutes. Step 2: 5 minutes back to 16:00, then 13 more minutes back to 15:47.
